

Case # 24

Married Male client with two children drew below art. His concern was planning and organization. He stated: “I am not kid and I do not want day plan or any plan”. However he wished comfortable life yet, because of unable to have any sorts of organization in his life he was much stressed. He said: “even my art, although is green and I like it yet, there is no order or smooth flow on it”. His observation and conclusion was very correct.

This is only art he did, the rest we worked within gestalt methodology and clinical hypnosis.
