

Case11

First drawing is belong to 37 old mother, who is worrying about her son. She told that she did not draw for a long time and do not know how is possible to do so. As the session progressed and her son showed a resistant to draw too, then she decided to draw. She drew and cried during the drawing session. She said, “This is true, I am so worried about him”. In this drawing her worry clearly shows, within eye and the angle of the drawing

Second one is the child work, 9 year male.

This was introductory session for both of them. Child wanting to care free, not much advocate of discipline, he desires to be free yet, have no idea about concept of freedom and wants and desires to have everything that he wants.
